

What are your office hours?

Monday through Friday: 10 AM to 5 PM Most office visits are scheduled two days of the week.

Home visits are scheduled on the remaining three days.

All lab work must be scheduled on Monday through Thursdays before 3 PM only. Special arrangements may occasionally be made for consultation visits (either an evening or on a Saturday). This is to allow both husband and wife may meet with me when it is not otherwise possible during normal business hours.

My office is located behind my home and the office phone is also answered at home. Because of this, I will answer the phone most any time it rings. However, I ask that you respect my office hours when calling me. Please do not call me at any time other than the office hours listed above unless you have an emergency or you think you might be in labor.

Because I am occasionally at a birth or doing a home visit, I am not always available at my office number (even during office hours). Clients may use my cell phone number to call me when they are unable to reach me at the office number. All others may leave a message and I will return your call as soon as I am able. Please leave your name and a phone number, along with the best time to reach you. 340 Naples Street
